Hair care

Enhance hair density

Prevents premature greying

Promote hair moisturizers

Recommended % of use 1-5 %

OLEOPINE™

ALEPPO PINE SEEDS
EXTRACT

Naturally distributed throughout the Mediterranean area, Aleppo Pine is considered as the dominant pine species in the natural pine Mediterranean Forests.

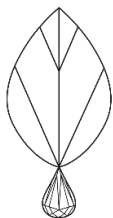

Aleppo pine also known as Jerusalem pine, is the wild tree of all the lower mediterranean area.

Its seeds are released from cones freshly matured usually between 8-10 weeks after their collection from trees.

The seeds have been traditionally consumed since ancient times for food due to their health promoting benefits.

From the pine seeds of the Aleppo pine is made a pudding called Zgougou in the Tunisian dialect; it is served in bowls, covered with cream, and topped with almonds and small candies.

Loaded of vitamins, rich in Antioxidants. One of the most aromatically pine extracts produced.

CORIANDER

CORIANDRUM
SATIVUM L.
FRUIT EXTRACT

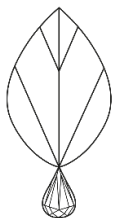

Coriander is an annual and herbaceous plant, belonging to the Apiaceae family. It is a culinary and medicinal plant, native of southern Europe and the western mediterranean region, this herb is cultivated world wide.

In Chinese and Ayurvedic medicine and traditional European medicine coriander seeds and its preparations have been used as stomach medicine. It has been used topically for treatment of inflammatory skin conditions, arthritis and rheumatism. It appears to play a greater medicinal role in other cultures, such as those of India, Iran, Pakistan, Morocco and Tunisia.

Its fruits (seeds) are used for flavouring candies, in cookery, perfumery, beverages and in the tobacco industry. It was one of the earliest spices used by mankind.

The extract obtained from its fruits is used both in flavours and in the manufacture of perfumes and cosmetics.

PRICKLY PEAR
TOTAL EXTRACT
OLEOPUNTIA™

Prickly pear plant, also known as Cactus Pear, Barbary Fig or Indian Fig Opuntia is cultivated through out the Mediterranean area, northern Africa, Middle East and Mexico.

The plant is considered an invasive species in northern Africa. It is the edible fruit of a plant in the Cactus family that grows in arid and semi-arid regions. Cactus fruits are usually consumed fresh, but are also put to different traditional and industrial uses.

Essential oils from the seeds are a source of oil. Seeds constitute about 10–15% of the edible pulp and are usually discarded as waste after extraction of the pulp. Oil processed from the seeds constitutes 7–15% of whole seed weight and is characterised by a high degree of unsaturation.

S. terebinthifolius is a species of tree that grows in South America with berries known as "red pepper" or "pink peppercorn," which emit a peppery aroma.

Pink pepper seed oil is extracted from pink pepper corns, it's a natural oil that can be distilled from a plant which usually contains the colours, odours and nutrients that give botanicals their unique profiles.

With all these sensory characteristics, it's no wonder they've been used in food, healthcare, beauty and wellness applications for such a long time.

It is used as a fragrance component in perfumes, cosmetics and soaps, it has a very popular modern accent piece in fragrances.

Historically, pink pepper was a highly valued spice of the ancient worlds; Romans and Greeks even levying a tax on it.

BOSWELLIA SACRA

RARE
PRECIOUS
INGREDIENT

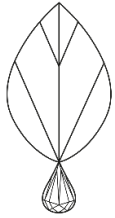

Frankincense Boswellia Sacra, dried resin from desert tree in Southern Arabia grows typically in Oman, it is an aromatic resin that is often used in perfumes and incense.

It has been traded in Northern Africa and the Arabian Peninsula for approximately five thousand years. Frankincense has also been depicted in ancient Egyptian murals.

The ancient Romans and Greeks are also known to have imported large amounts of frankincense resin to burn as incense and use during cremation ceremonies

It has a woody, spicy smell and can be inhaled, absorbed through the skin, steeped into a tea or taken as a supplement.

Used in Ayurvedic medicine for hundreds of years, frankincense appears to offer certain health benefits, from improved arthritis and digestion to reduced asthma and better oral health. It may even help fight certain types of cancer.

BLACK CUMIN
TOTAL
EXTRACT

Black cumin seed is referred by the Islamic prophet Muhammad as having healing powers for every disease except death.

Efficient since forever For thousand years, Black seed oil has been used and known as the ancestral natural remedy for its therapeutic and beauty benefits. Extracted from the small plant of *Nigella Sativa* (*N. sativa*), with pale purple, blue, or white flowers it spontaneously grows in North Africa, Middle East and West Asia.

People have used the tiny black seeds of the fruits of *N. sativa* as a natural remedy for thousands of years. It was also recommended as a soothing agent for skin disorders, wounds, and external irritations.

N. sativa has been used as a traditional medicine in the Middle East, as an antiseptic and anti-bacterial agent that eliminates harmful topical bacteria, thus stimulates a strong immune response.
