## Southeastern Performance Minerals, LLC

### CF 20 Muscovite Mica

#### General Description

CF 20 is a wet ground muscovite mica, processed specifically for cosmetic filler applications. Proprietary milling and classification achieves a high degree of delamination, which translates into a very high aspect ratio product. The narrow particle size distribution of CF 20 imparts superior slip and our unique crude source creates a filler that has a high degree of luster. CF 20 is produced from raw materials exclusively mined in the USA and is 100% certified child labor free.

#### Typical Properties

Sieve Analysis	% retained
+100 mesh	0%
+325 mesh	<4.0%
Bulk Density (Colgate)	6-12
Mean Particle Size ( $\mu\text{m}$ )	20-28
Color, L* value	>90
Moisture Loss @ 100°C	<0.5%
Specific Gravity	2.82
pH	6.0-7.5
CAS No.	12001-26-2

See SDS for safety and regulatory information.
